

Secure Communications Workshop & INdigital Regional Training

WHAT

The Secure Communications Workshop: Reinforcing 9-1-1 & Emergency Connectivity offers valuable insights and training on regulating secure vendor remote access, implementing micro-segmentation, embracing zero trust models, and applying secure engineering techniques, all catered specifically to the unique needs of the emergency communications field. [More information . . .](#)

INdigital Regional Training is designed to review the tools and features available to support your role in the 9-1-1 center. Topics will include ANGEN, Texty, MEVO, Toolkits/MSAG, and Logix.

ALABAMA 911 BOARD

WHEN

Tuesday, September 26, 2023
9 AM – 12 PM
Secure Communications Workshop

1 PM – 5 PM
INdigital Regional Training

WHERE

Morgan County EMA Auditorium
302 Lee Street
Decatur, AL

WHO SHOULD ATTEND

If you work in, supervise, manage, or provide technology support for the operations of a PSAP, these training sessions are for you. Attend one or both sessions.

Secure Communications Workshop: Reinforcing 9-1-1 & Emergency Connectivity

This training workshop offers valuable insights and training on regulating secure vendor remote access, implementing micro-segmentation, embracing zero trust models, and applying secure engineering techniques, all catered specifically to the unique needs of the emergency communications field.

Key Takeaways:

Secure Vendor Remote Access for 9-1-1 Systems: Learn how to safeguard access to essential systems while maintaining the responsiveness that 9-1-1 communications demand. Our experts will guide you through specific strategies tailored to emergency response environments.

Micro-Segmentation in Emergency Networks: Explore how to segment emergency communication networks effectively to minimize vulnerabilities. By dividing networks into secure compartments, you can protect vital services from potential breaches.

Zero Trust in Emergency Communications: Discover how adopting a zero trust approach can enhance security without hampering critical emergency response capabilities. This segment will provide essential tools and strategies designed explicitly for high-stakes, high-pressure environments.

Secure Engineering for 9-1-1 Systems: Delve into the methodologies for building resilient emergency communication systems from the ground up. From network architecture to software design, understand how to embed security into every layer.
